

T SOLUTIONS CLASSIC R

Preliminary Version Only

The cabinet is light and slim, which is made of die-casting magnesium and aluminum, and easy to achieve faster building and dismantling.

Light Weight

Rental

Thin

01 Die-casting magnesium and aluminum.

The cabinet is light and slim with die-casting magnesium and aluminum. With the design of circular tubular assembly, it is easy to carry the cabinet from any side.

02

Half panel available and all the same module.

One-module-version design makes it easy to store and replace for backup. Each module has two PCBs, no need to change the whole module as part of the LEDs stop working.

Separate PDU and modular design of power and signal.

03

04 Front and rear maintenance supported.

05 Curve screen optional.

Bend angle can reach to $\pm 10^\circ$.

06

Energy conservation IC and 4.5V power lower the consumption.

07

Climbing system optional.

Optional system can be added for convenient assembling and maintenance.
