

TW M10T

Touch Monitor

- Capacitive touch: 10-point projection capacitive touch technology, 5 milliseconds fast response, accurate and stable.
- High definition screen: Brand new LCD screen, high definition resolution, brightness 300cd/m². Clear and natural colors.
- Stable performance: Each machine has gone through many tests such as overall life test, temperature and humidity, electrostatic detection, vibration, high voltage, light press, display, etc.
- Customization support: Provides various customization services and flexibly adds multiple USB and serial ports.
- Easy installation: Supports multiple installation methods such as wall mounted/desktop/embedded, plug and play with power on, without debugging.

Type	IPS
Display size (inch)	10,1 INCH
Standard Resolution	1920x1200/1366x768/1280x800
Screen Ratio	16:9
Brightness	300cd/m2
Refresh Rate	60Hz
View angle	178°/178°
Touch Screen	Capacitive Touch
Touch validity	>35,000,000 / >50,000,000
Touch Points	10 points
Contrase ratio	1000:01
Video input format	RGB
Power supply	100 to 240VAC (DC 12V)
Power consumption	Max 30W
OSD control	AUTO,+,POWER,-,MENU brightness,contrast ratio,auto adjustment,phase position,clock,Languages,function,Install,reset
